Appl. No. 09/826,632

Amdt. Dated August 20, 2003

Reply to Office action of June 6, 2003

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-2 (canceled)

- 1 Claim 3 (prevously amended) An apparatus comprising:
- 2 a vibration motor having:
- a base having a front surface;
- a rotary member provided on the front surface of the
- 5 base; and
- a cover having an electromagnetically shielding
- 7 property and a top and sides covering the rotary member, wherein
- 8 the top has a flat surface;
- a board on which the vibration motor is mounted; and
- a shield member covering at least a part of the board,
- wherein the vibration motor is disposed inside the shield member.

Claim 4 (canceled)

- 1 Claim 5 (previously amended) An apparatus according to
- 2 claim 3, wherein the cover has a hole for connecting spaces of
- 3 inside and outside of the cover to each other.

Appl. No. 09/826,632 Amdt. Dated August 20, 2003

Reply to Office action of June 6, 2003

- Claim 6 (previously amended) An apparatus according to
- 2 claim 3, wherein the cover perfectly contacts to the front
- 3 surface of the base to perform positioning of the cover in a
- 4 height direction.
- 1 Claim 7 (previously amended) An apparatus according to
- 2 claim 3, further comprising a fillet formed on an outside of the
- 3 base and used for positioning the vibration motor.
- 1 Claim 8 (previously amended) An apparatus according to
- 2 claim 3, wherein the cover is electrically connected to the
- 3 board.

Claim 9 (canceled)

- 1 Claim 10 (previously amended) Portable electronic equipment
- 2 comprising an apparatus according to claim 3.

Claim 11-12 (canceled)

- 1 Claim 13 (previously amended) An apparatus according to
- 2 claim 3, wherein the cover is made of resin;
- 3 the cover is coated with non-electrolytic copper; and
- 4 the cover coated with non-electrolytic copper is coated
- 5 with non-electrolytic nickel.

Appl. No. 09/826,632 Amdt. Dated August 20, 2003 Reply to Office action of June 6, 2003 (previously amended) An apparatus according to Claim 14 1 claim 13, wherein the resin is selected from the group consisting 2 of acrylonitrile, butadiene and styrene. Claim 15 (currently amended) An apparatus comprising: 1 a vibration motor having: 2 a base having a front surface; 3 a rotary member provided on the front surface on the 4 base; 5 an eccentric member provided on the rotary member; and 6 a cover having an electromagnetically shielding property and covering the rotary member and the eccentric member; R a board on which the vibration motor base is mounted, and 9 a shield member covering at least a part of the board, 10 wherein the vibration motor is disposed inside the shield member. 11 Claim 16 (currently amended) An apparatus comprising: 1 a vibration motor having: 2 a base having a front surface; 3 a rotary member provided on the front surface of the 4 base; and 5 a cover having an electromagnetically shielding 6 property and covering the rotary member; 7 a board on which the vibration motor base is mounted; 8 a shield member covering at least a part of the board, 9

wherein the vibration motor is disposed inside the shield member;

10

11

and

3

- a housing enclosing the board and shield member.
 - Claim 17 (previously added) An apparatus according to claim 15, wherein the cover has a hole for connecting spaces of inside and outside of the cover to each other.
 - Claim 18 (previously added) An apparatus according to claim 15, wherein the cover contacts to the front surface of the base to perform positioning of the cover in a height direction.
 - 1 Claim 19 (previously added) An apparatus according to
 2 claim 15, further comprising a fillet formed on an outside of the
 3 base and used for positioning the vibration motor.
 - Claim 20 (previously added) An apparatus according to claim
 by the cover is electrically connected to the board.
 - 1 Claim 21 (previously added) Portable electronic equipment 2 comprising an apparatus according to claim 15.
 - 1 Claim 22 (previously added) An apparatus according to 2 claim 16, wherein the cover has a hole for connecting spaces of 3 inside and outside of the cover to each other.
 - 1 Claim 23 (previously added) An apparatus according to

Appl. No. 09/826,632 Amdt. Dated August 20, 2003 Reply to Office action of June 6, 2003

3

- claim 16, wherein the cover contacts to the front surface of the
- base to perform positioning of the cover in a height direction. 3
- An apparatus according to Claim 24 (previously added) 1
- claim 16, further comprising a fillet formed on an outside of the 2 base and used for positioning the vibration motor.
- Claim 25 (previously added) An apparatus according to claim 1
- 16, wherein the cover is electrically connected to the board. 2
- Claim 26 (previously added) Portable electronic equipment 1
- comprising an apparatus according to claim 16. 2
